Thermal Solutions

Innovation-Quality-Global

INTRODUCTION

We are mainly dealing with low voltage electrical products for switchgear board and automation industry, such as panel filter and fans, panel heaters, thermostats and hygostats , wiring accessories, etc. Through our decades' efforts and developments now LINKWELL become a group company with several factories by entirely holding or partly holding , not only self production but also few trading, in order to provide one- stop-solution for panel builders.

Our main markets are European countries, Americans and China market. You can find us in more than 60 countries all over the world, well-known with very good reputation in the market for the sake of our good quality and competitive prices, kind and prompt services to clients.

LINKWELL ELECTRIC policy is to offer a full support to Clients:

- pre-after sales assistance
- customized products
- fast delivery
- monitoring of customers' satisfaction

Rather than a supplier, LINKWELL ELECTRIC aims to be a Client's industrial PARTNER!

Our company always pays special attention to protecting the benefits of clients' so that both the clients and our company are able to gain the maximum benefits from the relations between us.

We warmly look forward to establishing, reinforcing and expanding long term fruitful relationship with the reliable clients all over the world.

Let's get busy and pull together to create a better future!

CONTENTS

LK33/ FF / FK55 series filter 01-31

Cabinet top ventilator 32-36

Air-cooled Conditioner 37-40

Thermostat Hygostat 41-55

Heater 56-67

Multiplane fan 68-75

Lamp for Cabinet 76-88

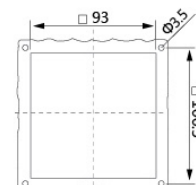

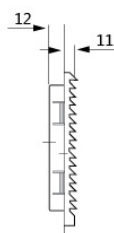

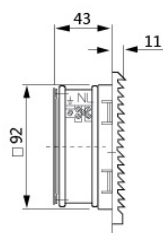

Cabinet Ventilation

LK 3321 series filter

EMC Fan and filter

Fan and filter	Fan and filter	Exit filter	Installing section
LK 3321 ...	LK 3321.230	LK 3321.300	LK 3321 ...

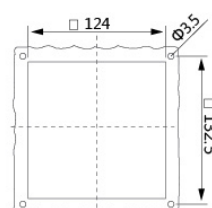

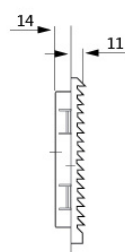

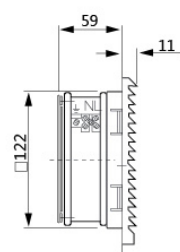

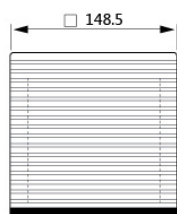

Model No. fan-and-filter unit LK	3321.230	3321.115	3321.024
Model No. fan-and-filter unit EMC	3321.230-EMC	3321.115-EMC	3321.024-EMC
Rated operating voltage V, Hz	230, 50/60	115, 50/60	24 (DC)
Air throughput, unimpeded air flow	25/35 m ³ /h		35 m ³ /h
Air throughput with outlet filter including standard filter mat	1 x LK 3321.300: 20/25 m ³ /h		
Axial fan	Self-starting shaded pole motor		DC motor
Rated current max.	0.08 A	0.14 A	0.18 A
Power	18/14 W		4.3 W
Noise level	37/41 dB(A)		41 dB(A)
Temperature range	-30 to +70°C		
Colour	RAL 7035, different colours on request		
Protection category to EN 60 529/09.2000	IP 54 standard IP 56 when using a hose-proof hood		
Model No. outlet filter LK / EMC	3321.300 / 3321.300-EMC		
Design	made of injection-moulded thermoplastic, self-extinguishing UL 94 V0		

EMC Fan and filter

Fan and filter	Fan and filter	Exit filter	Installing section
LK 3322...	LK 3322.230	LK 3322.300	LK 3322...

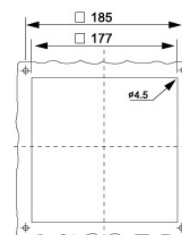

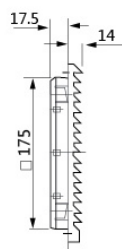

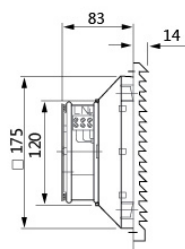

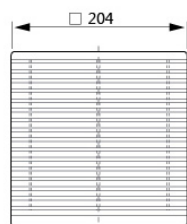

Model No. fan-and-filter unit LK	3322.230	3322.115	3322.024
Model No. fan-and-filter unit EMC	3322.230-EMC	3322.115-EMC	3322.024-EMC
Rated operating voltage V, Hz	230, 50/60	115, 50/60	24 (DC)
Air throughput, unimpeded air flow	65/85 m ³ /h		85 m ³ /h
Air throughput with outlet filter including standard filter mat	1 x LK 3322.300: 55/70 m ³ /h		
Axial fan	Self-starting shaded pole motor		DC motor
Rated current max.	0.12/0.10 A	0.24/0.20 A	0.35 A
Power	19.0/14.0 W		7.7 W
Noise level	36/40 dB(A)		40 dB(A)
Temperature range	-30 to +70°C		
Colour	RAL 7035, different colours on request		
Protection category to EN 60 529/09.2000	IP 54 standard IP 56 when using a hose-proof hood		
Model No. outlet filter LK / EMC	3322.300 / 3322.300-EMC		
Design	made of injection-moulded thermoplastic, self-extinguishing UL 94 V0		

LK 3323 series filter

Fan and filter	Fan and filter	Exit filter	Installing section
LK 3323...	LK 3323.230	LK 3323.300	LK 3323...

Model No. fan-and-filter unit LK	3323.230	3323.115	3323.024
Model No. fan-and-filter unit EMC	3323.230-EMC	3323.115-EMC	3323.024-EMC
Rated operating voltage V, Hz	230, 50/60	115, 50/60	24 (DC)
Air throughput, unimpeded air flow	105/126 m³/h		105 m³/h
Air throughput with outlet filter including standard filter mat	1 x LK 3323.300: 71/82 m³/h 2 x LK 3323.300: 85/98 m³/h		
Axial fan	Self-starting shaded pole motor		DC motor
Rated current max.	0.12/0.10 A	0.24/0.20 A	0.35 A
Power	19.0/14.0 W		7.7 W
Noise level	36/40 dB(A)		40 dB(A)
Temperature range	-30 to +70°C		
Colour	RAL 7035, different colours on request		
Protection category to EN 60 529/09.2000	IP 54 standard IP 56 when using a hose-proof hood		
Model No. outlet filter LK / EMC	3323.300 / 3323.300-EMC		
Design	made of injection-moulded thermoplastic, self-extinguishing UL 94 V0

REF600 Cabinet top ventilator

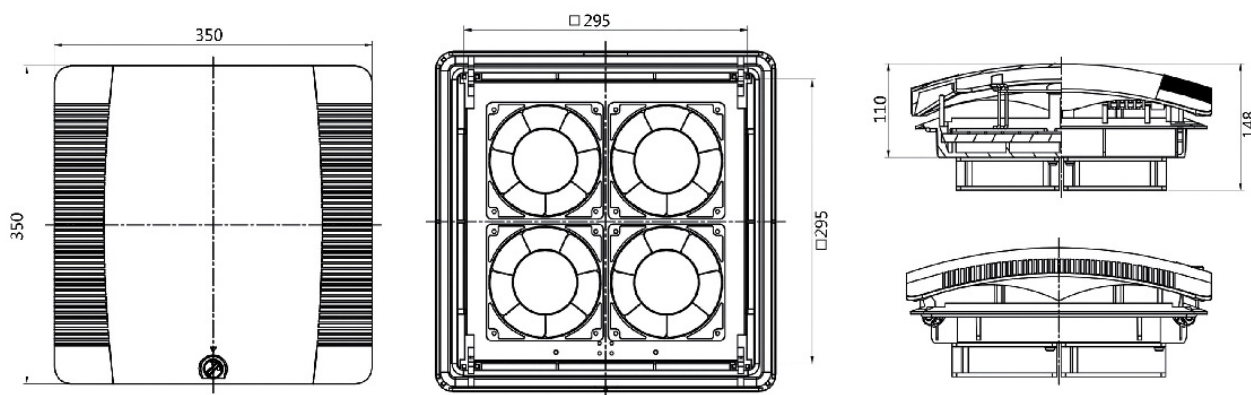

Adopting innovative mounting clamp, easily snap-in

Features:

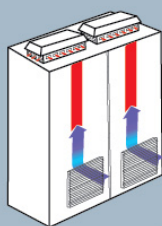

- Easy and fast snap in mounting that does not require screw
- Adjustable mounting clamps fit for different cabinet thickness range from 1.5 to 3.5mm
- IP54 protection, G3 standard filter pad
- Tool-less and quick replacement of the filter pad, just turn the button on the top
- RAL7035, other colors as per request
- AC voltages as standard type, DC voltages could be offered

KTF Cabinet top ventilator

Adopting innovative mounting clamp, easily snap-in

Features:

Easy to fit and maintain

- Innovative mounting clamps enables flexible snap-in the filter fan either from inside or outside of the enclosure
- Easily connecting with power supply via a plug
- Easy maintain, safe and quick replacement of filter pad

Large air throughput range and high efficiency

- Air throughput range: 500-1000m³/h

High protection level

- An exquisite labyrinth construction and super quality polyurethane foam seal ensures the ingress protection rate up to IP55
- International certification and approval

color: RAL 7035

Protection class, conform to IEC60529 standard:

without filter mat

with filter mat

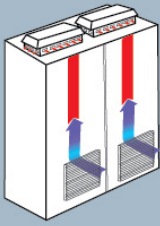

Note: Use of a temperature controller or temperature display device is suggested for optimal performance.

Supply lists :

A complete set of assemblies for installation directly on cabinet, including filter mat

Air throughput, free air flow : 500-942 m³/h

Temperature

Humidity

Technical explanation:

The premise of using top-mounted fan:

Ambient temperature should be lower than the temperature that is required to be in the switchboard. Taking top-mounted fan into account when there isn't enough space for a side-mounted filter fan in the cabinet.

Top-mounted fan of the cabinet will bleed the air from the top of the cabinet and drive the heat out so as to protect the electric apparatus and keep them running at the temperature within controllable range. And the structure is more proper because it won't take up space in the cabinet.

EN 60529/10.91 reaches IP54. The retractable high-power centrifugal fan is able to prevent moisture as well as mechanical damage, with its labyrinth rain-proof structure, which with the help of the sealing frame, can reach an IP code up to IP54 as per EN 60529/10.91. The centrifugal fan is mainly useful for discharge of high-heat load at peak efficiency.

Adoption of the centrifugal fan will be able to reduce the noise resulting from air friction as well as avoiding the vortex discharged by normal shaded pole fan.

The quantity and dimensions of inlet filters could be determined according to the actual situation.

Please mark B behind corresponding model if a stainless shell required.

We can provide products with different voltage as required by clients.

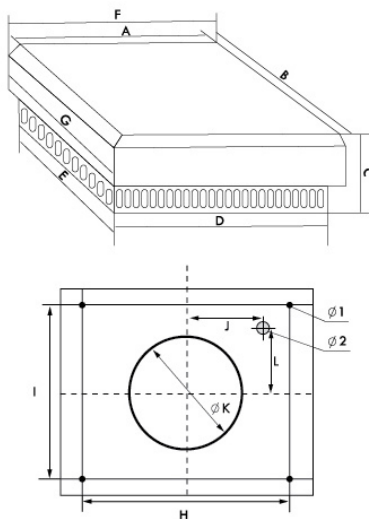

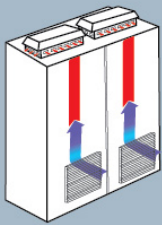

Using LK33 or EF series Exit Filters at the side of the cabinet not only can prevent water and dust entering the cabinet, also make the air through the whole cabinet for cooling.

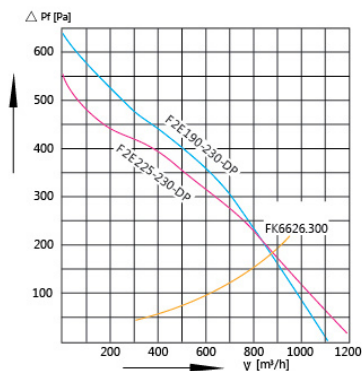

Exhauster on the top	Type	KRF-670	KRF-950	KRF-1410
Voltage Frequency		230V 50/60HZ		
Air flow/free discharge of air		620/670m³/h	910/950m³/h	1250/1410m³/h

Noise level		55/56 dBA	60/62 dBA	65/70 dBA
Temperature range		-10°C~55°C		

The quantity and size of the air inlet filter meet the requirements of particular users

F2E Cabinet top ventilator

Power specific property curve

Interior

The precondition to use the top fan is that the ambient temperature should be lower than the temperature required in the cabinet.

Function

The high-power centrifugal top fan can vent the high heat load by the greatest degree. The centrifugal fan not only can avoid the vortex vented by the general shield magnetic fan, but also can reduce the noise caused by the friction of air. The FK series of Exit Filter can be used in the inlet in order to prevent from entering the humidity and dust.

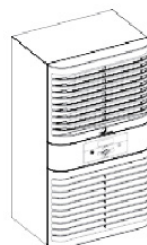

Design

The centrifugal top fan is larruping. It is handsome and it has the good function and reasonable structure. It also doesn't take up the interior space. It can well satisfy requirement of the present market with it's unique design.

The quantity and size of the wind inlet filter can be decided according to the concrete requirement

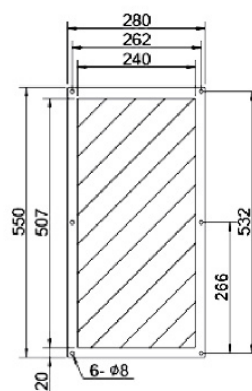

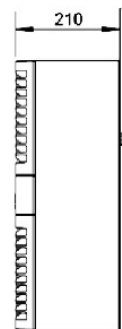

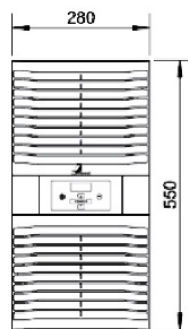

Side mounting

Installation opening size

Features:

- Intelligent inverter control, without transient electric current, up to 40 % less energy- consumption.
- Complete isolation inside and outside,dust-proof, oil&mist proof,moisture-proof etc.
- Compact size , Compatible with main models in the industry.
- Flexible working temperature adjustment from 15℃ ~55℃.
- Chinese and English bilingual LCD display menu , easy access to parameter setting and alarm information checking.
- Providing MODBUS communication , with power on START-UP function.
- Dust-proof net plug,quick change conveniently.
- Condensate water treatment, efficient solution to the problem of condensate discharge.
- Nano coating, anti-corrosion ability.
- Selectable smoke, access control and flooding alarm.
- 7*24*365 uninterrupted operation for more than 10 years.

KTH-082 Temperature&Humidity Remote Controller

(Energized state)

Overview

Adopting the MCU control system, the product provide a real time monitoring and controlling over temperature and humidity, which assures an appropriate ambient temperature and humidity through intelligent climate control.

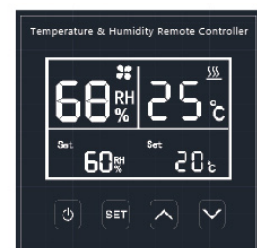

Specifications

Input voltage	AC220V±10%, Other voltages can be customized
Humidity range	20-90%RH (no condensation)
Humidity accuracy	±5%RH (at 25℃)
Temperature range	-20-80℃
Temperature Accuracy	±1℃ (at 25℃)
Humidity set range	20-80%RH
Operating temperature/humidity	temperature -20℃--60℃, humidity 10--95 %RH (no condensation)
Storage temperature/humidity	temperature -10℃ ~ 40℃, humidity10- 90%RH (no condensation)
Switching capacity	pure resistance load AC250V/10A, DC30V/5A
Power down memory	Intelligent memory for its preset parameter in case of power failure

1.Functions

1.1The temperature and humidity values are displayed on a high definition LCD screen.Displaying diagram as below:

- ◆Displaying humidity measurement by 2 digits, i.e: 60%RH
- ◆Displaying humidity set value : In the set state, 500ms/time , humidity set value is blinking ,i.e: 40%RH.
- ◆Displaying temperature measurement value by 2 digits, i.e: 25℃
- ◆Displaying temperature set value : In set state, 500ms/ time. temperature set value is blinking: i.e.: 25℃.
- ◆Dehumidifying mode indication:
When the equipment is in dehumidifying mode, it display the status by the dynamic fan.
- ◆Heating mode indication:
when the equipment is in heating mode, it display the status by heating signal.

1.2Button

- ◆"POWER": Press this button to switch on or off.
- ◆"SET": In the boot state, press this button, the product is in setting mode for temperature of humidity. Meanwhile, the digital display of humidity or temperature blinking.If no button press within 10 seconds, it automatically exit the setting status .
- ◆"PLUS":In the set state, press this button, the set values increase one as per each single press. The max. Humidity set value is 80%RH,and the max. temperature set value is 60℃.Exiting setup automatically, if no button press in 10 seconds
- ◆"MINUS":In the set state, press this button, the set values decrease one as per each single press. The min. Humidity set value is 10%RH,and the min. temperature set value is 5℃.Exiting setup automatically, if no button press in 10 seconds

2. Output Control

2.1 Humidity Output Control

If the measured humidity exceeds the set value, output relay closed for dehumidifying. And the dynamic fan displays the operation status. If the measured humidity are 5% RH less than the set value, dehumidifying stopped, the dynamic fan indicator off. The humidity difference are 5%RH so as to avoid the frequent switch over the critical point which shorten service time.

With initial power on, there are 3 seconds' time-delay from output control, i.e. The dehumidifying controller starts action in 3 seconds under the right humidity, indicator display the running mode.

2.2 Temperature Control Output

If the measured temperature exceeds the set value, the output relay closed for heating. Thus the heating signal display the operation status. If the measured temperature are 2 °C less than the set value, heating stopped, the heating signal off. The heating difference are 2 °C so as to avoid the frequent switch over the critical point which shorten the service time.

With initial power on, there are 3 seconds' time-delay from output control, i.e. The heating relay controller starts action in 3 seconds under the right humidity, indicator displays the running mode.

Power down memory protection

With power down memory protection, it could save user's setting parameter on equipment in case of sudden power off.

Communication

This product adopts 485 communication mode, which allow the temperature, humidity parameter and running status to be uploaded to the remote computers. The display mode as below:

Temperature&Humidity Remote Control Display System

Enclosure No.	Measured Temperature	Measured Humidity	Running State
1#	25°C	60%RH	Running
2#	25°C	60%RH	Stop
3#	25°C	60%RH	Running
4#	25°C	60%RH	Stop
5#	25°C	60%RH	Stop

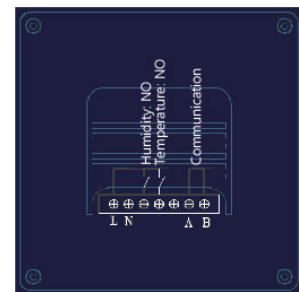

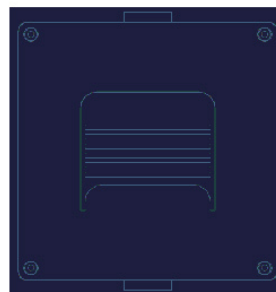

It can display the temperature, humidity parameter and running status of 5 cabinet enclosures at same time.

3. Dimensions and connection diagram

3.1 Flush mounted controller, opening size 82.5*82.5mm

3.2 Terminal block diagram at backside of controller

- (1) Power: AC220V/50HZ: Connect power supply with terminal L and N
- (2) Load Terminal: Connect the heater with NO contact ; Connect the fan with NC contact .
- (3) 485communication terminals; connect A and B

4. USB Converter Connector

4.1 USB terminal on the left side :

Connect with the USB port on the computer, installation requires a USB drive (see details on 485USB drive);

4.2 RS485 on the right side: connect controller with terminal A and B.

KTOMF 012/KTSMF 012 Thermostat

Benefits:

- Integrated integration: AC input, AC output, offering convenience in use.
- With LED indicator, easier to recognize working state.
- Small size for a variety of applications.
- Stable long - time operating.
- ROHS compliant.

Features:

- Humidity control: If the relative humidity exceeds the value set on the humidity dial, the electric circuit is cut off. Return difference is 5 - 10% RH.
- Temperature control: If the ambient temperature rises above the value set on the temperature dial, the electric circuit is cut off. A tolerance of 1 - 3°C is allowed.
- Power: AC220V. Other voltage is alternative.
- Current: Max 46mA.
- Operating conditions: Temperature: - 10 to 50°C; Humidity: 40 - 90%RH.
- Storage conditions: Temperature: - 20 to 60°C; Humidity: 20 - 95%RH.
- Humidity sensor: Polymer humidity resistance.
- Temperature sensor: Bimetal sensor.

Elements:

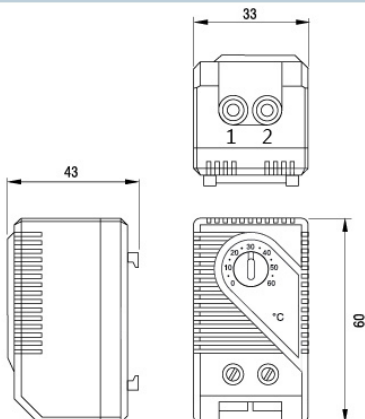

- Set up the operation range by adjusting the knob. When the relative humidity drops below the value pre - set, the electric circuit is closed via terminal LED illuminates. When the relative humidity rises above the value pre - set, the electric circuit is cut off via terminal LED blacks out. In order to protect the loads not to work too frequently, the return difference is 5 - 10%RH, means the electric circuit is closed when the humidity drops 5 - 10% below more than the value pre - set.
- Set up the operation range by adjusting the knob. When the ambient temperature drops below the value pre - set, the electric circuit is closed via terminal LED illuminates. When the ambient temperature rises above the value pre - set, the electric circuit is opened via terminal LED blacks out.

Humidity switching difference	4%RH(±3% tolerance)
Temperature switching difference	7k(±4k tolerance)
Temperature sensor element	Bimetal sensor
Relative humidity range	35% - 95%RH
Temperature control contact mode	Step type contact point
Humidity control contact mode	Chang - over switch
Mean life	750,000 cycles
Min Switching capacity	20VAC/DC 100m A
Max Switching capacity	250VAC/DC 5(1)A DC30W
Connection	5 - pole terminal, clamping torque 0.5Nm Max for solid wire 2.5mm ² and stranded wire(with wire and ferrule) 1.5mm ²
Installation	35mm Din rail
Casing	UL94V - 0, light grey
Dimension	70x63x40mm
Weight	90g
Fitting position	Cabinet top
Operating temperature	0 - +60°C(+32 - +140°F)
Storage temperature	- 20 - +80°C(- 4 - +176°F)
Protection level	IP20

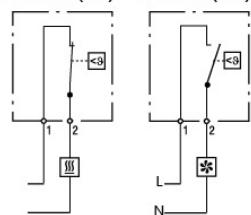

- Large setting range ■ Small size ■ Simple to mount
 - High switching performance
- KTO 011:** Thermostat (normally closed); contact breaker for regulating heaters.
- KTS 011:** Thermostat (normally open); contact maker for regulating filter fans and heat exchangers or for switching signal device when temperature limit has been exceeded.

Installing method

Temperature range	0-60°C
KTO 011 NC (Normally closed)	When the temperature reaches the set value, open circuit
KTS 011 NO (Normally open)	When the temperature exceeds the set value action, closed circuit
Switch temperature difference	7K(±4K tolerance)
Sensor element	thermostatic bimetal
Contact type	Snap-action
Contact resistance	< 10m ohm (Incidental connection line)
Service life	> 100,000 cycles
Max. Switching capacity	250VAC, 10(2)A 120VAC, 15(2)A 30WDC at 24VDC to 72VDC
Connection	2-pole terminal, clamping torque 0.5Nm max.: rigid wire 2.5mm ² , stranded wire (with wire end ferrule) 1.5mm ²
Casing	plastic according to UL94 V-0, light grey
Installation	35mm DIN Installation guide
Dimensions	60×33×43mm
Weight	40g
fitting position	variable
Operating/Storage temperature	-20°C to +80°C
Protection type	IP20

KNO 011/KNC 011 New Panel Thermostat

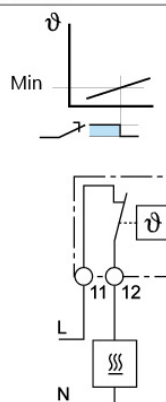

Panel thermostat

- Small, compact size (17.5mm wide)
- Long electrical life
- Snap action thermostatic Bimetal sensor
- 35mm rail (EN 60715) mount
- Wide temperature setting range

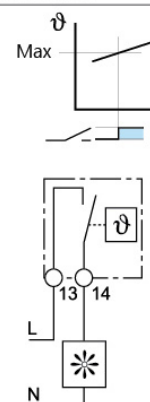

Heating control - Should the panel temperature fall below the (minimum) set temperature the contact will close to call for heat. The contact will open when this set temperature is exceeded.

Ventilation control - Should the panel temperature exceed the (maximum) set temperature then the contact will close to call for cooling. The contact will open when the temperature falls below this set temperature.

• Heating control

• Ventilation control

Function out of order defined: Temperature sensor or humidity sensor fault; Duration of Dehumidifier work is over 24 hours, RH≥80%RH.

ZR 011 Dual Thermostat

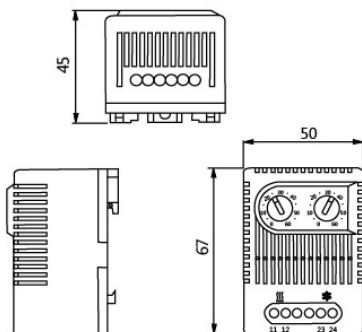

- NO and NC in one casing
- Separate adjustable temperatures
- High switching capacity
- Terminals easily accessible
- Clip Fixing

Two thermostats in one casing:

Thermostat(contact breaker, normally closed)for regulating heaters
Thermostat(contact make, normally open) for regulating filter fans and heat exchangers or switching signal devices when temperature limit has been exceeded.

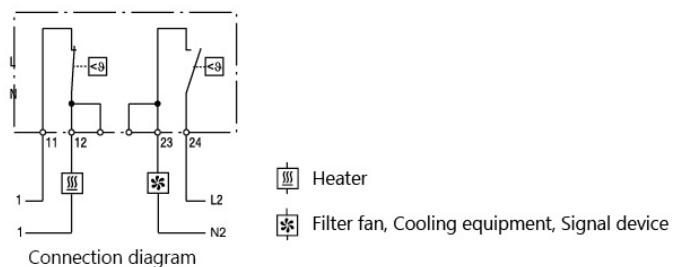

Heaters and cooling equipment can be switched independently from each other with a temperature offset a he usual change-over contacts.

MFR 012 Electromechanical Hygrostat

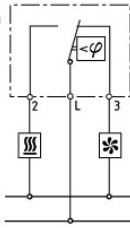

- Adjustable relative humidity
- Change-over contact
- High switching capacity
- Easily accessible terminals
- Clip fixing

The electromechanical hygrostat is designed to control enclosure heaters so that the dew point is raised when a critical relative humidity of 65% is exceeded. In this way condensation and corrosion in enclosures with electric/electronic components is effectively prevented.

Connection

Connection diagram

EFR012 Electronic Hygrostat

- Temperature and humidity adjustable
- Optical operating display (LED) ▪ Clip fixing
- High switching capacity

The electronic hygrotherm senses the ambient temperature and relative humidity in an enclosure with electric / electronic components and turns on a heater (or alternatively a fan) at either set point, helping prevent the formation of condensation in the enclosure. The LED integrated in the adjustment knob on the active controller is lit when the connected device is in operation.

- Large setting range
- Optical operating display (LED)
- Change-over contact
- Small hysteresis
- Clip fixing

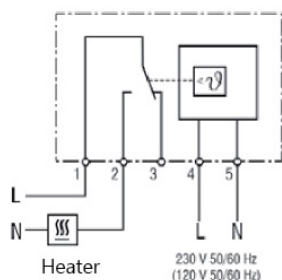

The electronic thermostat is used for controlling heating and cooling equipment, filter fans or signal devices. The thermostat registers the surrounding air and can switch both inductive and resistive loads via relay with change-over contact. The LED integrated in the adjustment knob is lit when the NC contact is closed (e.g. when a connected heater is operating).

Electronic Hygrotherm ETF 012

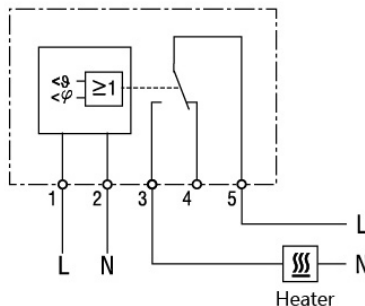

- Temperature and humidity adjustable
- High switching capacity
- Optical operating display (LED)
- Clip fixing

The electronic hygrotherm senses the ambient temperature and relative humidity in an enclosure with electric / electronic components and turns on a heater (or alternatively a fan) at either set point, helping prevent the formation of condensation in the enclosure. The LED integrated in the adjustment knob on the active controller is lit when the connected device is in operation.

Connection diagram

Switch difference (temperature)	2K (±1K tolerance) at 25°C/77°F (50% RH)
Switch difference (humidity)	4% RH (±1% tolerance) at 25°C/77°F (50% RH)
Reaction time (humidity)	5 sec.
Contact type	change-over contact (relay)
Contact resistance	< 10m ohm
Service life	NC: 50,000 cycles NO: 100,000 cycles
Max. Switching capacity (relay output)	NC: 240VAC, 6(1)A
	NO: 120VAC, 8(1.6)A
	NC: 240VAC, 6(1)A
	NO: 120VAC, 8(1.6)A
EMC	100WDC at 24VDC
	acc.to EN 55014-1-2, EN 61000-3-2
Optical indicator	EN 61000-3-3
	LED
Connection	5-pole terminal for 2.5mm ² , clamping torque 0.5Nm max, rigid wire 2.5mm ² stranded wire (with wire end ferrule) 1.5mm ²
Mounting	clip for 35mm DIN rail, EN 60715
Casing	plastic according to UL94 V-0, light grey
Dimensions	77×60×43mm
Weight	approx. 0.2kg
Fitting position	vertical
Operating / Storage temperature	0 to +60°C (+32°C to +140°F) / -20°C to +80°C (-4°C to +176°F)
Protection type	IP20

Example of connection

Art. No.	Operating voltage	Setting range temperature	Setting range humidity	Approvals
01230.0-00	230VAC, 50/60Hz	0 to +60°C	50 to 90% RH	CE
01230.9-01	120VAC, 50/60Hz	0 to +60°C	50 to 90% RH	CE

Features:

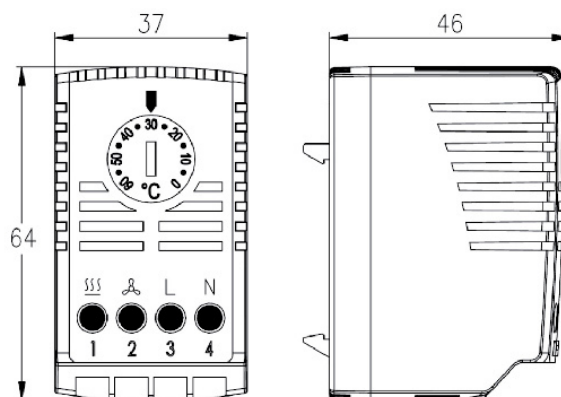

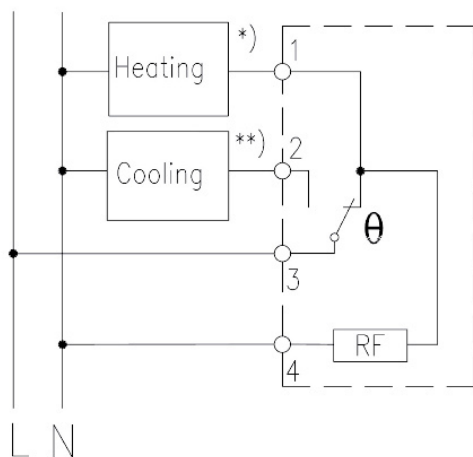

- Easily mounted on 35mm DIN rails with snap on attachment per EN50022

Product Description:

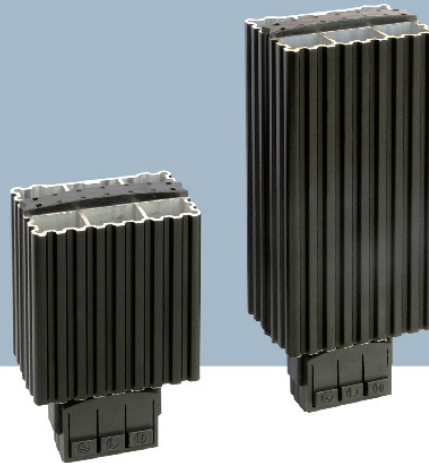

Temperature controller for controlling cabinet heaters, filter fans, slide-in fans, heat exchangers etc.

- Locking adjusting knob grey scala
- Standard thermic reduction

Storage temperature	-20° bis + 80°C
Switching current	100-250VAC
Heating (opened con.)	10 A (2) DC 30W
Cooling (closed con.)	5 A (2) DC 30W
Switching hysteresis	Approx. 5 K (with thermic reduction approx.1K)
Contact	2 way
Connection	4 screw terminals 2,5 mm ²
Sensor element	Bimetal
Service life time	> 100.000 switching cycles
Temperature control range	0...+60°C
Surface finish	Plastic light grey UL94VO
Dimension (WxHxD)	37x64x46mm
Weight	0.06 kg
Protection type	IP20

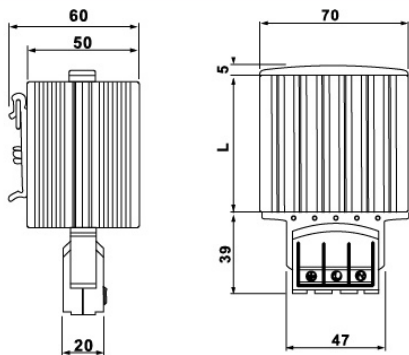

HG140 Type Heater

- Pressure clamp connectors
- Dynamic heating up
- wide voltage range
- Temperature limiting
- Energy saving
- Clip fixing
- Quick installation

These heaters are used in enclosures where damage from condensation must be prevented or where the temperature may not fall below a minimum value. The aluminium profile heater body design has a chimney effect and distributes the heat evenly. The pressure clamp connectors save time and simplify installation.

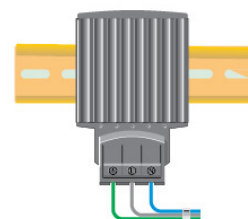

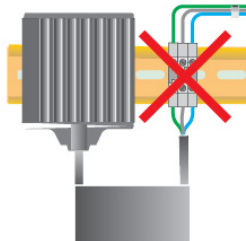

Size chart

Operating voltage	120-250V AC/DC
Heating element	PTC resistor, self regulating and temperature limiting
Heater body	extruded aluminium profile, anodised
Connection casing	3 pressure clamps for stranded wire 0.5-1.5mm ² (with wire and ferrule) and rigid wire 0.5-2.5mm ² plastic according to UL94 V-0, black
Mounting	clip for 35mm DIN rail, EN 50022
Fitting position	vertical
Operating/Storage temperature	-45 to +70°C (-49 to +158°F)
Protection type/Protection class	IP20/I(earthed)
Certificate	CE

Operating with voltages below 140V AC/DC reduces heating performance by approx. 10%

HGL046 Type Compact Fan Heater

- Compact Design
- Clip fixing
- Long service life
- Maintenance free
- Temperature safety cut-out

Compact fan heater prevents formation of condensation. The integrated high performance axial fan provides forced air circulation and so guarantees an even temperature in enclosures. With internal terminal connector.

- Compact design
- Double insulated
- Integrated thermostat or hygrostat

The compact high performance fan heater prevents formation of condensation and provides an evenly distributed interior air temperature in enclosures with electric/electronic components. The plastic enclosure provides double insulation and acts as protection against contact. The fan heater is available with integrated thermostat or pre-set hygrostat for temperature or humidity control. The CT 030 was designed as a stationary unit for the bottom of the enclosure. For wall fixing the fan heater CR 130 is recommended.

DA 084

DA 284

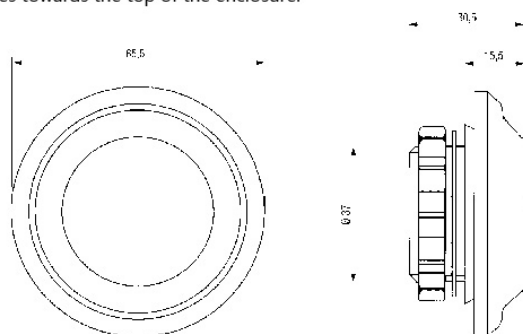

- High degree of protection
- Easy to install

It has become more and more important to provide a protected enclosure environment for valuable and crucial electrical and electronic components. In a tightly closed enclosure, pressure differentials can occur during extreme temperature variations. The specially designed pressure compensation device DA 084 permits a controlled change in pressure and avoids the entering of dust and water. The pressure compensation device is suitable for the use in enclosures and housings in accordance with DIN EN 62208.

Mounting	PG 29 thread with union nut
Material	plastic according to UL94 V-0
Air interface	approx. 7cm ²

Weight	31g/pieces

Installation

Make cut-out φ 37mm in enclosure wall and mount pressure compensation device with nut. Please make sure that the sealing gasket is put in place on the outer side panel of the enclosure. For optimal pressure compensation we recommend to use two devices on opposite sides towards the top of the enclosure.

Art. No.	Protection type	1 packing unit	Weight (approx.)
08400.0-04	IP55	2 pieces	62g (31g/piece)

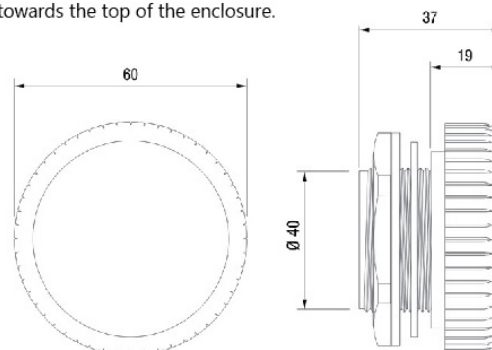

- High degree of protection
- Waterproof membrane
- Easy to install

Pressure differentials in enclosures with a high degree of protection are a result of internal and external temperature changes. In the case of negative pressure or partial vacuum, dust and humidity can enter the enclosure through the door seal. When the air inside the enclosure cools down, condensation may occur because the humidity cannot escape the enclosure. The easy-to-install pressure compensation device DA 284 provides compensation of pressure at a protection degree of IP66. Even with a slight overpressure, a waterproof membrane inside the plug allows the humidity to escape whilst blocking water and dirt from entering the enclosure.

Mounting	thread M40 x 1.5 with nut
Torque	5Nm (max. 10Nm)
Depth in enclosure	approx. 16mm
Sealing	sealing gasket NBR
Filter	waterproof membrane
Air permeability	1200l/h at a pressure difference of min. 70mbar
Dimensions	Ø 60 x 37mm
Fitting position	variable
Operating/Storage temperature	-35 to +70°C (-31 to +158°F)

Installation

Make cut-out Ø 40.5+0,5mm in enclosure wall and mount pressure compensation device with nut. Please make sure that the sealing gasket is put in place on the outer side panel of the enclosure. For optimal pressure compensation we recommend to use two devices on opposite sides towards the top of the enclosure.

Application

LK12-W Series LED light is designed for instrument cabinet illumination of various switchgear, built in infrared sensor switch , and simplify the user's application design.

Features and advantage

- Built in infrared sensor switch , the user do not install additional switch.
- Economize on energy, In the case of Illuminate effect same alike the traditional light, economizing on energy is 75% above.
- Life span is long, the LED light source, someone call it the longevity light, meaning to extinguish never. It's the solid cold light source, adopt a special electric circuit design, the life span can reach to for 100,000 hours, comparing traditional light source life span to grow 1000% above.
- The environmental protection performance is better, without ultraviolet ray and infrared rays in the spectrum, without calories and radiate, the dizzy light is small, and the castoff can recover, without pollution and do not contain the mercury chemical Element. The cold light source, can be touched, belong to typical model of the green illuminate light source.
- Special circuit design, if anyone LED is bad, it isn't without influence to normal illumination of others LED.
- Special structure design, light body position can be adjusted, that solves the problem of less illumination angle of LED.

Technique parameters

Power supply	AC(50/60Hz)/DC (80-265V) , or other voltage customer demand.
Average illuminance at 300mm from lamp	>300lx
Color rendering index Ra	> 85
Switch	built in infrared switch, active distance 20~80mm
Terminal	screw terminal, 0.5mm ² ~2.5mm ²
Working environment temperature	-25℃ ~+55 ℃
Fix method	Two hole fixation
Color of the light	white
Protection class	IP20
Withstand voltage	AC2500V , 1Min
luminescence component	LED
Rated humidity	25% ~95%
Life span	More than 100,000hours
Power	6W

Models explanation

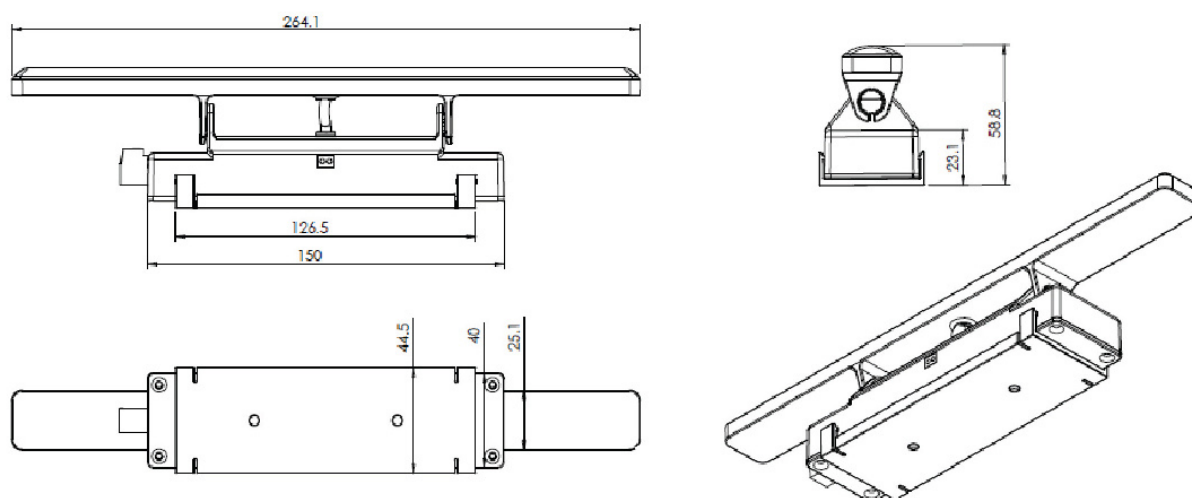

LK 12 - W - 

Voltage code A: AC(50/60Hz)/DC (80-265V), C: DC48V, D: DC24V

Light color: White

Design number

Dimension

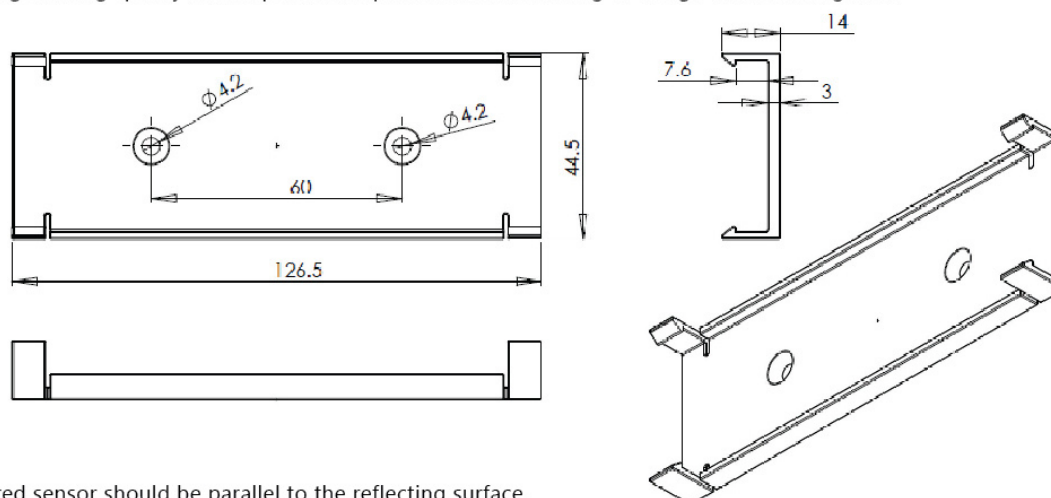

Installation

Installation: first fix the fixed plate on the position that the lamp need to be install , and then push the lamp into the fixed plate to complete the installation.

Remove: use a screwdriver to remove 4 bayonet from the slot of the fixed plate, and then extract the lamp to complete the disassembly.

Fixed screw: Slotted countersunk flat head screws (common head style), M4*8, ISO 2009

The following drawing specify a fixed plate size , please use this drawing to design the mounting hole.

Note: Infrared sensor should be parallel to the reflecting surface.

KCL250-5/KCL400-5 LED Emergency Light for Switchgear Mannuals

Product Name: LED Emergency light for Switchgear, Input Voltage: USB5V

Product Code: KCL250-5 (250mm)

KCL400-5 (400mm)

Product Features:

1. Adopting the technology of P.I.R infrared motion and photosensitive sensor.
2. Mounting: Magnetic fixing, or with screws
3. Power: Charging by USB5V or 220V power.
4. Using new type LED light source, with the performance of high brightness, low attenuation, long lifetime up to 3000h and high reliability.

Instruction for Switches :

Switch on: Long press switch for 2 seconds

Switch off: Long press switch for 2 seconds

1st Gear: switch off, the default mode for the light

2nd Gear: constant light , the light on state

(Adjusting method: Long press 2 seconds in 1st gear state)

3rd Gear: induction power -saving mode(40% brightness)

(Adjusting method: Press ON-OFF switch in 2nd gear state)

4th Gear: induction mode(100% brightness)

(Adjusting method: Press ON-OFF switch in 3rd gear state, the green indicator light automatically on.)

Note: the 3rd Gear and 4th gear requires the ambient brightness less than 3LUX, the distance between the light and human within 3m, then get lighting automatically, and turns off with 20s delay after leaving,.

Operation Time:

2nd gear: 5 continuous working hours

3rd gear: constant light state, 12.5 continuous working hours, the actual working time depends on the lighting time.

4th gear: constant light state, 5 continuous working hours, the actual working time depends on the lighting time.

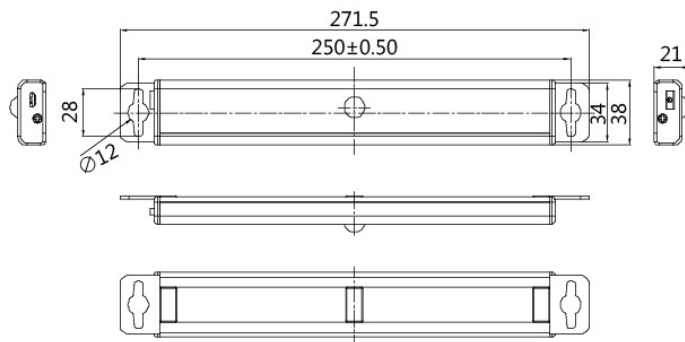

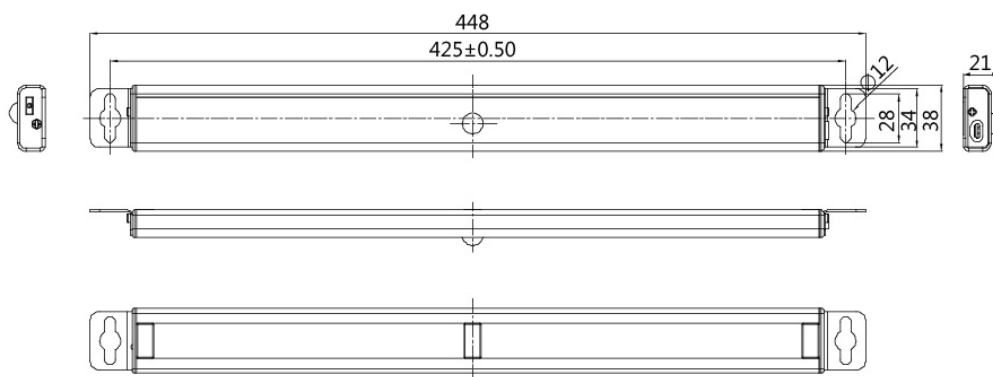

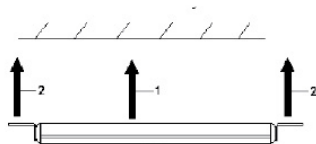

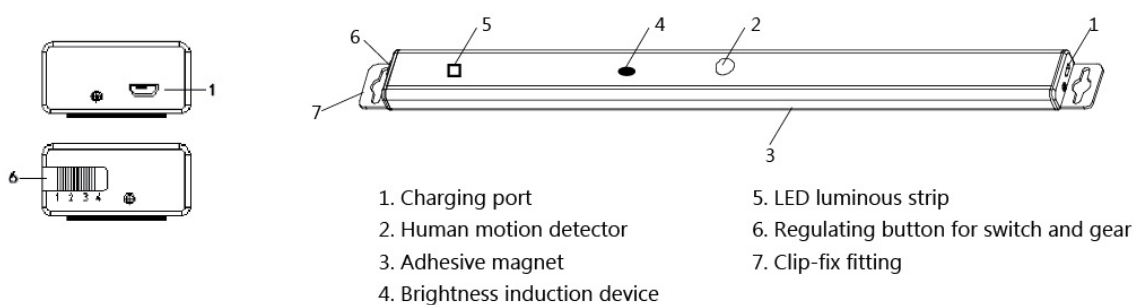

(All above working time should be calculated in the full charging state)

Charging instructions:

In-Charge: Blue indicator light on

Full-Charge: Red indicator light on

Charging time: approximately 4-6 hours

Drawings for products:

Mounting instruction:
1. Magnetic fixing
2. Screw mounting

Warnings

Don't install the light in the area with moisture , high temperature or venting air to ensure the normal use.
Charging timely once the light dimming to ensure the normal use of the lithium battery.
Don't charge more than six hours.

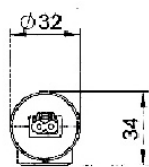

LK 025 Energy-saving light

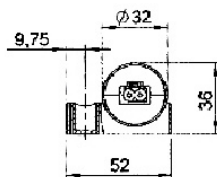

- Wide voltage range
- Integrated power unit
- Long-lived, maintenance-free
- Energy-saving by LED technology
- Daisy chain
- Magnet or screw fixing
- Quick connection

The lamp series LK 025 is suitable for all types of panels and enclosures, especially where space is at a premium. The lamps have a very long service life thanks to the use of LED technology. They are available with powerful non-slip rubberized magnets allowing them to be quickly positioned in any steel enclosure. Alternatively they can be fixed mechanically. The power output allows up to 10 lamps to be connected to each other (daisy chain). Both the power input and output connectors snap lock into their sockets. With the integrated power unit and the plugs the lamp can quickly be connected.

Technical Data

Power consumption	max. 5W
Luminosity	290lm at 120°C (870lm at 360°C or equivalent 75W light bulb)
Lamp type	LED, angle of radiation 120°
	Light color: daylight, color temperature: 6,500K
Service life	60,000h at 20°C (68°F)
	2-pole connector with snap lock
Connection	AC: max. 2.5A / 240VAC, color: white
	DC: max. 2.5A / 60VDC, color: blue
Mounting	magnet fixing or
	screw fixing, M5, 250mm centers
Casing	plastic, transparent
Dimensions	351 x 34 x 32mm (with magnet fixing)
	351 x 36 x 32mm (with screw fixing)
Operating / Storage temperature	-30 to +60°C (-22 to +140°F) / -40 to +85°C (-40 to +185°F)
Operating / Storage humidity	max. 90% RH (non-condensing)
Protection type / Protection class	IP20 / II (double insulated)

Art. No. magnet fixing	Art. No. Screw fixing	Operating voltage	Switch	Weight (approx.)
02540.0-00	02540.0-01	100-240VAC, 50/60Hz (min. 90VAC, max. 265VAC)	on/off light switch	0.2kg
02540.1-00	02540.1-01	24-48VDC (min. 20VDC, max. 60VDC)	on/off light switch	0.2kg

Application

LKL10-W Series LED light is designed for instrument cabinet illumination of various switchgear.

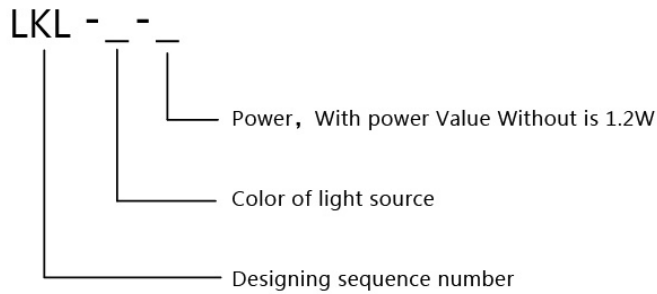

Features and advantage

- ◆ Economize on energy, In the case of Illuminate effect same alike the traditional light, economizing on energy is 75% above.
- ◆ Life span is long, the LED light source, someone call it the longevity light, meaning to extinguish never. It's the solid cold light source, adopt a special electric circuit design, the life span can reach to for 100,000 hours, comparing traditional light source life span to grow 1000% above.
- ◆ The environmental protection performance is better, without ultraviolet ray and infrared rays in the spectrum, without calories and radiate, the dizzy light is small, and the castoff can recover, without pollution and do not contain the mercury chemical Element. The cold light source, can be touched, belong to typical model of the green illuminate light source.
- ◆ Special circuit design, if anyone LED is bad, it isn't without influence to normal lumination of others LED.
- ◆ Special structure design, light body position can be adjusted, that solves the problem of less lumination angle of LED.
- ◆ The power supply adapt to AC/DC110~230V,suitable in application case of switchgear especially .
- ◆ With two mounting methods of clamp and fixation.

Technique parameters

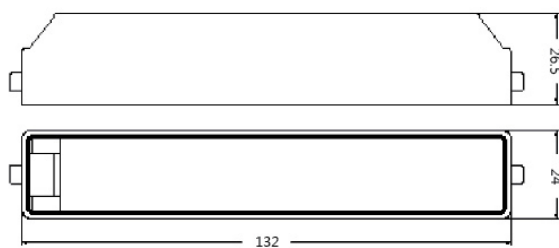

Enclosure material	PC-ABS(halogen-free)
Protection category	IP 20
Power supply	AC(50/60Hz)/DC 110V~230V
Wire connection	1×4mm ² or 2×1.5mm ²
Insulating strength	AC2500V, 1Min
luminescence component	LED
Ambient temperature	-25℃~50℃
Relative humidity	25% ~ 95%
Life span	More than 100,000hours

Models explanation

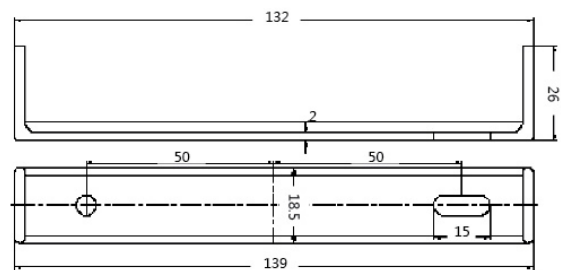

TYPE	LKL10-W	LKL10-W-3
Color of light source	White	Black
Power	1.2W	3W

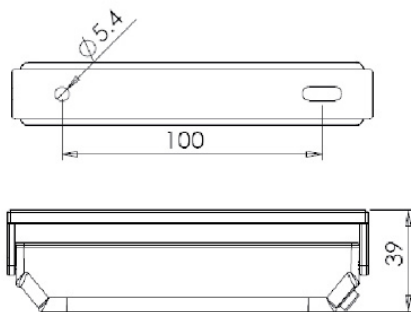

Dimension diagram

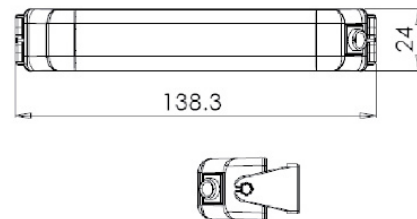

Dimension of LKL10-W light body

Dimension of LKL10-W light bracket

Dimension of LKL10-W-3 light body

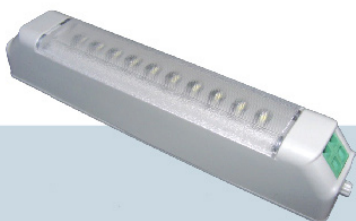

Dimension of LKL10-W-3 light bracket

Installation

Assemble by clamp or bolt fixation. Assemble bracket first, then connect the power cable into light body terminal, insert the terminal side of light body into assemble hole of bracket, another side insert into the another side of bracket with screwdriver.

The angle between the support and the light body can be adjust according to the lumination need.

T5 Fluorescent Cabinet Lamp

- High brightness, small size, with on/off switch
- High lighting effect, save 55% power
- Long life non flicker and can start by low voltage
- T5 Fluorescent with Opal Cover, Or with Striate Cover

Model	Name	voltage	Power	PF	Dimension	Color temperature	QTY/CTN

T5 LED Cabinet Lamp

- The LED Lighting has no strobe, no infrared and ultraviolet, radiation free,. Mercury free protect the natural environment
- High-quality LED chips as the illuminant, save more power, LED chip is antistatic.
- LED chips are solid encapsulation, they belong to cold light type, impact resistance, shockproof,. easy for installation.
- Start fast, Long life: operation life about 50 thousand hours.

Characteristics

Operating speed	0.1 mm/s to 50cm/s (in case of pin plunger)
Operating frequency	Mechanical: 120 operations/ min Electronic: 30 operations/ min
Contact Resistance	25m Ω (mm) (Initial)
Insulation resistance	100m Ω Min. at 500VDC
Dielectric strength	1000VAC, 50/60Hz/ 1 min between terminals of same polarity
	1500VAC, 50/60Hz/ 1 min between current-carrying metal parts and ground
	1500VAC, 50/60Hz/ 1 min between each terminal and non-current-carrying metal part
Vibration resistance	10-55 Hz, 1.5mm double amplitude
Shock resistance	Mechanical durability: 1,000m/Sec ² (approx.100G ² S) False action durability: 300m/Sec ² (approx.30G ² S)
Ambient operating temperature	Operating -10 ~+ 70 $^\circ$ C (no icing)
Ambient operating Humidity	95%RH Max
Service life	Mechanical > 10,000,000 operations, Electrical > 500,000 operations
Degree of protection	IP65 (IEC standard)

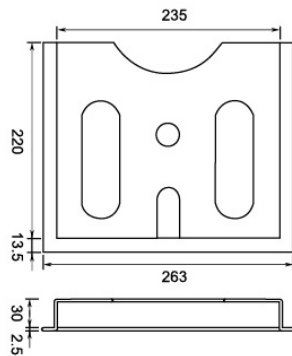

LK-705

Sealed enclosures when subject to external temperature fluctuations develop pressure differential toward the ambient. As a consequence entrance of dust and/or humidity is likely to happen through leakage points. Installing a LK-705 prevents this risk while preserving a high protection degree for the enclosure.

Features	unit	Characters
Material	-	ABS self-extinguishing
